MY PROFILE

Software Engineer with two years of experience in full-stack development, specializing in .Net &.NET Core and Angular. Skilled in developing Legal case systems for the US market, leading R&D initiatives, optimizing software, and deploying on IIS servers. Passionate about DevOps practices and dedicated to streamlining development and deployment processes. Adept at working in Agile environments and delivering high-quality, reusable code under pressure. Recognized for problem-solving abilities, innovative thinking, and consistently delivering on time.

PROFESSIONAL EXPERIENCE

MedcubeUSA LLC | Colombo 03 **June 2024 - Present**
Software Engineer

AeliusCase - Management System - (Angular, .NET Core, EF Core, PrimNG , MySQL)

A web application designed to streamline legal case management by improving case tracking, document handling, communication, and task scheduling.

- Built core modules for managing Customers, Tasks, Events, Notes, Medical Indexes, and Email integrations.
- Managed IIS site configuration and handled the full deployment process to ensure smooth releases.
- Provided night-shift production support, monitoring live bugs and resolving database issues to maintain system stability.
- Mentored new developers and interns, serving as the primary technical point of contact to help them solve complex coding issues and bugs.
- Responded rapidly to client requests, delivering quick fixes and updates to keep the production flow uninterrupted.

August 2025- Present

Ikase Data Migration to Aeliuscase - (MYSQL)

- Developed an ETL pipeline using custom MySQL scripts to migrate complex legal records (firms, customers, and cases) from legacy systems.
- Automated data transformation and cleaning to ensure all historical records met the formatting requirements of the new database schema.
- Executed weekend production migrations to ensure zero downtime and maintain service availability for live clients.
- Performed data validation and integrity checks on thousands of records to ensure all case and user histories were perfectly preserved.

December 2025 - Present

Aeliuscase Web Version for Mobile - (Angular, PrimNG)

Adapted the desktop interface into a mobile-responsive web app, making it easy for legal professionals to access all features directly through their phone's browser.

- Built the responsive UI to ensure a smooth experience and high performance across all mobile devices and screen sizes.
- Configured server-side redirection in IIS using Web.config to automatically detect mobile users and route them to the mobile domain.
- Managed cross-platform testing to ensure all desktop features—like document viewing and case tracking—worked perfectly on mobile browsers.

AeliusCase Mobile - Android App - (Flutter, Dart) **Oct 2025 - Dec 2025**

Developed a Flutter-based Android app to bring legal case management to mobile, including a secure dashboard, document access, and calendar.

- Led R&D efforts to research and test the best ways to integrate the mobile app with our existing infrastructure, ensuring a smooth connection between the phone and the server.
- Connected the app to the backend by integrating .NET APIs and MySQL databases for real-time data synchronization.
- Implemented secure authentication and encrypted token storage to protect sensitive legal data on mobile devices.

DocSearchAI - Web App - (React,) **Feb 2026 -Present**

- Delivered immediate Change Requests (CRs) under tight deadlines to meet urgent production requirements and client needs.
- Integrated a new AI model by updating the server-side backend connections, ensuring the app provided accurate document summarizations.
- Overhauled the Main Dashboard UI, implementing complex interface changes to improve how users interact with summarized data.

Dialog Axiata PLC | Colombo 02 **Jan 2023 - Aug 2023**
Software Developer Intern
Dashboard for AWS Elastic Service - (Java, Spring Boot, ReactJs, Tailwind CSS, DynamoDB)

Dashboard designed to manage and visualize AWS Elastic Service data. It combines both frontend and backend components to provide an intuitive user interface and robust functionality.

- Utilized React.js for front-end development, integrating seamlessly with Rest API.
- Implemented the back end using Java and the Hibernate Spring Boot Framework.
- Collaborated with AWS and DynamoDB for effective data management.
- Employed the Rasdial command line tool for VPN and proxy configurations.

EDUCATION & CERTIFICATIONS

BSc (Hons) Software Engineering
Cardiff Metropolitain University UK (ICBT -Sri Lanka)
Graduated with Second Upper Class

TECHNICAL SKILLS

- **Frontend Development**: React, Next.js (App Router/Server Components), Angular, Prime NG, Tailwind CSS.
- **Backend Development: .**NET Core, Java (Spring Boot), Node.js, Next.js
- **State Management**: TanStack Query (React Query), Zustand
- **Testing & Architecture**: React Testing Library (RTL), Monorepo architectures, Agile Scrum..
- **Database:** SQL Server, MySQL, MongoDB**.**

STRENGHT & KEY ATTRIBUTES

- Challenge Acceptor, Fast Learner, and Committed to On Time Delivery.
- Strong Problem-Solving Skills, Analytical Thinking, and Innovation.
- Good Coding Practices and Error Handling and Debugging
